Projects

My Portfolio

- Developed a Portfolio Website using HTML, CSS, and JavaScript, showcasing my skills and projects.
- Integrated Bootstrap and Tailwind CSS frameworks for enhanced design and user experience.
- Leveraged ReactJS for dynamic rendering and efficient routing.
- This project demonstrates my proficiency in web development and my ability to create engaging and functional web applications.

Quiz Platform

- Built and deployed a comprehensive Quiz Platform application from scratch, utilizing React and CSS.
- Designed an intuitive user interface using Bootstrap and Material UI.
- Implemented responsive design practices, following a mobile-first approach for optimal user experience on various devices.

Entertainment App

- Built and deployed a comprehensive Entertainment Application from scratch, utilizing Next JS and CSS for the frontend and Node.js, Express.js, and MongoDB for the backend.
- A web application that allows users to discover, bookmark, and view trending movies and TV shows using The Movie Database (TMDb) API.
- Error Handling: Displays appropriate alerts and messages for different user actions and errors.

Chat Application

- Developed and deployed a full-featured Chat Application from the ground up, using React.js and CSS for the frontend, along with Node.js, Express.js, and MongoDB for the backend.
- Real-time chat room with message updates, Handling new messages, edits, and deletions in real-time.
- User authentication using JWT tokens, CRUD operations for chat messages, WebSocket functionality for real-time messaging.

Sticky Notes

- Built and deployed a comprehensive Sticky Notes Application from scratch, utilizing React, CSS, Node JS, Express JS and MongoDB.
- Leveraging Material-UI for styling and React-Draggable for draggable functionality.
- Fetch all sticky notes from the backend when the component mounts.
